30 June 2020

Dear All,

As discussed with Dr. Brescini and Dr. Marangi, I hereby confirm our offer for a renewal subscription to the AdisInsight database by Springer Nature.

AdisInsight is a subscription database purchased by pharmaceutical companies, financial organizations, academic and government institutions to assess, track and analyse global drug development. The database contains drug profiles summarizing the development of the drug from bench research through market launch, clinical trial profiles providing all details around clinical studies, including results when the study is completed, deals amongst organisations involved in drug discovery and development, amongst other information.

Please find below the proposed option for a 5-user renewal. Since a multi-year commitment is usually more advantageous as it allows us to define a fixed increase and block prices, we can offer the following:

€4250 for the period 1 June 2020 - 31 May 2021

€9400 for the period 1 June 2021- 31 May 2022

Content sets: AdisInsight Drugs, Deals and Trials

Number of users: 5

For any further inquiries relevant to the offer and license, the Agency may refer to:
