

Biosimilari: trend dei consumi

Analisi grafica del trend dei consumi espressi in numero di confezioni, DDD, unità posologiche erogate nel canale acquisti diretti

(Dato NSIS/Tracciabilità del farmaco aggiornato a dic-2023)

Elaborazione Ufficio MSF

SINTESI REPORT 1 – TREND DEL CONSUMO

L'introduzione sul mercato dei medicinali biosimilari rappresenta certamente un vantaggio per la governance della spesa farmaceutica. L'incidenza dei consumi dei biologici a brevetto scaduto, tuttavia, risulta essere notevolmente diversa non solo a seconda del tipo di molecola considerata, ma anche stratificando l'analisi in base alle diverse realtà territoriali. Gli approfondimenti proposti nel presente documento hanno l'obiettivo di valutare l'andamento dei consumi dei farmaci biologici a brevetto scaduto, come rilevati nel canale degli acquisti diretti (flusso NSIS della tracciabilità del farmaco), non solo con riferimento all'intero territorio nazionale, ma anche nei diversi aspetti regionali. L'approfondimento, inoltre, non si limita alla semplice comparazione dei trend tra originator e biosimilare, ma inserisce anche l'andamento dei prodotti appartenenti alla stessa categoria terapeutica (IV livello ATC). La rappresentazione del numero di confezioni, delle DDD e delle unità posologiche erogate mensilmente, consente di monitorare l'andamento nel tempo del consumo dei biosimilari rispetto al farmaco originator e ai prodotti appartenenti alla medesima categoria terapeutica nel periodo considerato e nelle diverse realtà regionali. A livello nazionale si evidenzia un tendenziale incremento nel consumo dei biosimilari, specialmente per le molecole con prodotti di più recente commercializzazione.

ABRUZZO. Trend mensile consumo (confezioni, DDD, unità posologiche)

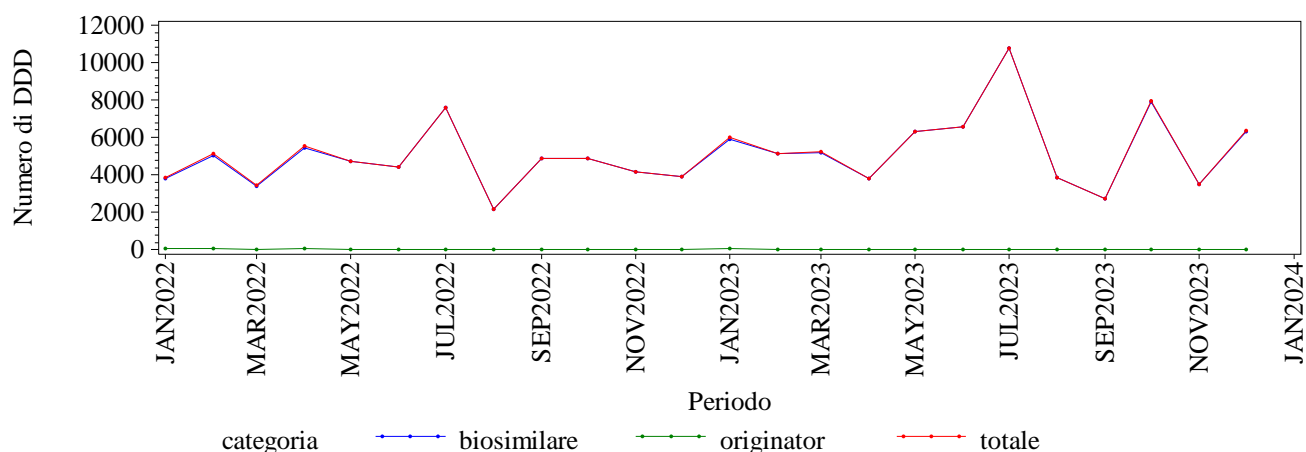

ABRUZZO. BEVACIZUMAB - Andamento mensile dei consumi (confezioni)

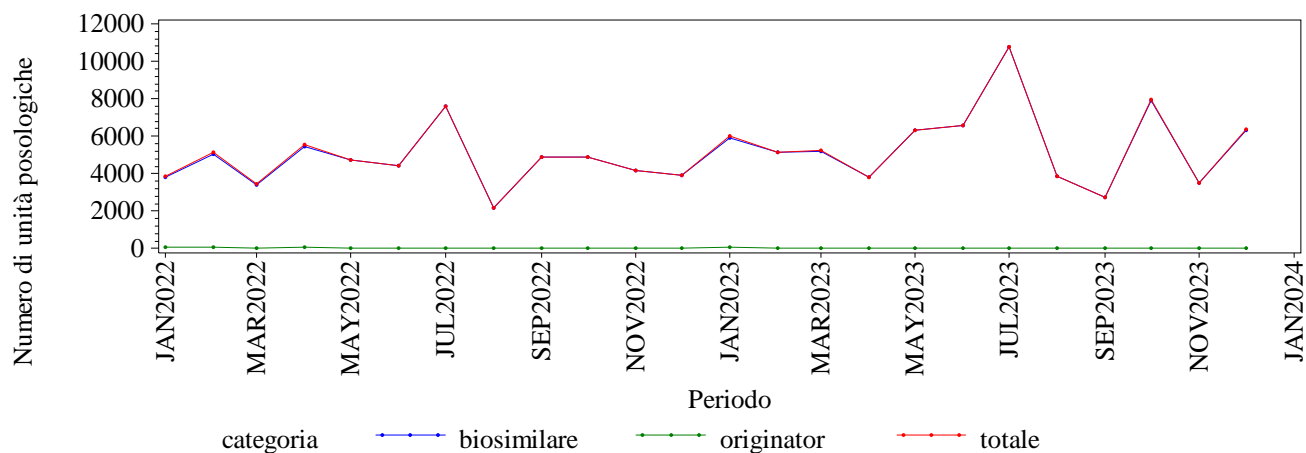

Elaborazione AIFA – Ufficio Monitoraggio della spesa farmaceutica
 Dato NSIS/Tracciabilita' aggiornato dic-2023

ABRUZZO. BEVACIZUMAB - Andamento mensile dei consumi (DDD)
